

I listen to K-LOVE radio. To my knowledge it is the only contemporary Christian radio station in my local listening area. I also understand you are considering making changes that could remove K-LOVE from my listening area. I believe that would be very damaging to this listening area as, again, I believe it's the only station with it's particular format in my area. K-LOVE provides a great community service through it's community updates and on-air bulletin boards. Please do not make changes that could remove this station from my listening area! Please do not limit national broadcasting!
